| 1. Core Java, Python | 4. Html, CSS, Javascript |
| 2. React Js | 5. Node Js |
| 3. MySql | 6. Git and Github |

PROJECTS

• EXPENSE MANAGER

Expenseless project for expenditure is a strategic initiative that aims to optimize spending and minimize unnecessary expenses in a specific project or expenditure.

The project emphasizes responsible financial management and creative solutions to cut costs without compromising quality or effectiveness.

• MORALIZER

The application uses the Article Extractor and summarizer API from rapid-api.com to generate summaries of articles. The project incorporates CSS for styling, providing a convenient and efficient way to design the user interface of the application.

Users can input the URL of an article they want to summarize, and the application sends a request to the GPT article summarizer API. The API processes the article and returns a summarized version, which is then displayed to the user.

• CRYPTOVERSE

In this web application we can track all the cryptocurrencies value in the market. It also shows the latest news of cryptocurrency by using Rapid API.

Ensure that the user interface is intuitive and easy to navigate. Users should be able to quickly understand how to track cryptocurrencies, view charts, and access news.

EXPERIENCES

1. OASIS INFOBYTE, DELHI, IN

Front End Developer, **Feb 2023 - May 2023**

- Created a web application called ExpenseManager.
- Using Chart Js created a page for graphical representation of expenditure.
